EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Lawrence Stahl on February 16, 2006.

Claim 1, line 12, "a initializing" has been change to --an initializing--.

2. The following is an examiner's statement of reasons for allowance: claims 1, 20 and 21 are allowable for setting forth a punching device comprising an operating member having cam portions and a control means for controlling the movement of the operating member. The control means performs an initializing operation for moving the operating member to a first rest position or a second rest position before the operating member performs a punching operation for punching holes.

For example, Fukumoto et al. (6,622,908 B2), hereinafter Fukumoto, teach a punching device comprising an operating member 35 having cam portions and a control means for controlling the reciprocal movement of the operating member. Fukumoto does not teach the control means being able to perform an initializing operation for moving the operating member to a first rest position or a second rest position before the operating member performs a punching operation for punching holes.
